New York is the biggest city in the USA. There are over eight million people living there. The population of New York City is about three times larger than that of Taipei City. The city is famous for different cultures, so tens of millions of people around the world come here every year. There are many famous places in the city, such as Central Park and Times Square.

Travelling to New York City can be expensive because it often costs a lot to stay in **luxurious** hotels. For example, you may spend over 400 dollars staying in a five-star hotel. However, Jonathan Powley came up with an idea to help people cut the cost of accommodation if they don't mind sleeping in the back of a taxi cab. These taxis are in the city center and very close to Times Square and Grand Central Station. With less than 40 dollars a night, people can enjoy a great view of Manhattan from the back of a taxi cab!

Each of the taxis has a large bed and a fan in it, but there is no room for a bathroom, so guests need to use the bathrooms of some restaurants in the area. After talking with so many guests, Powley found that people wanted to travel in this way just because they wanted to try something different. Next time when you have a chance to visit New York, maybe you can try sleeping in a taxi!
