"Look! This strawberry has a big nose." "Ha! These apples look funny." "Let's buy them to make some juice today." My children are shopping happily in a fruit and vegetable store, and I can hear them talking about each strange-looking fruit. They enjoy doing this.

The fruit and vegetables here are cheaper because they don't look good. "Supermarkets don't want to sell them, so farmers would just throw them away. What a waste," said the shopkeeper. "Look at them. They are perfectly fresh and taste just as delicious as more beautiful produce. So, I thought of the idea of opening this store," she said proudly.

Farmers won't lose money from having to throw away ugly fruit and vegetables, and customers don't need to spend more money on beautiful fruit and vegetables. Look at my kids. They love digging out the most strange-looking fruit in the store to make yummy juice for our family because we are just fine with the "ugly" food.

Dear Pancake House,

My name is Kitty. I am writing this letter to ask you to stop using plastic tableware. Many of my friends and I love eating at Pancake House. We go to your restaurant a lot because you sell delicious pancakes. However, there are only disposable plastic straws, knives, and forks for us to use, and those are very bad for our environment.

A lot of disposable plastic tableware ends up in the ocean. It may get into sea animals' noses or stomachs and then kill them. Metal tableware is better for our environment because you don't have to throw it away after each use. Would you please help us save the Earth by no longer using plastic tableware and choosing metal tableware instead? If you do so, we will love your restaurant even more and invite all our friends to go there more often.

Sincerely,
Kitty

Taiwan is no stranger to pandemics. In 2003, SARS hit the country hard. Hundreds of people got sick, and over 70 died. The country later faced the bird flu and H1N1. Because of those events, the government created several ways to handle possible pandemics. They helped stop those pandemics from spreading through the people.

During the COVID-19 pandemic, the government put a lot of effort into action. That made Taiwan a successful country to fight the pandemic well. There was little spread and only a few people died.

Taiwan also shared its ways with the world. It quarantined people with COVID-19 then traced and tested the people that they had contact with. Also, when they didn't have enough face masks, they limited how many masks each person could buy. Then, they worked fast to make more face masks.

Most importantly, Taiwan got its people to help. Everyone wore masks in public, social distanced, and washed their hands often. Taiwan really set an example for the world to follow, and people in Taiwan all wish the world the same success.
