Students in Taiwan usually feel unhappy and tired because they need to stay at school for a long time every day. They have to deal with many classes and much homework. Besides, some of them even go to cram schools after that. For example, please look at the result of the survey in Class 708 in Apple Junior High School. 18% of the students go to cram school for four days a week or more. That's really surprising.

But why do these students go to cram school for so many days? Maybe that's because they can't finish their homework without others' help; or some classes like English and math are too hard for them.
